Review of the event

International River Day was celebrated by NCC Department of Arts and Commerce College, Phondaghat. On this occasion NCC cadets of the college celebrated International River Day by collecting plastic from Ugavai river. On the occasion of this activity, the principal of the College Dr. Vishnu Fulzele wished the cadets and every NCC cadet should take it as their duty to keep the rivers clean in their village and create public awareness in the society. Because human existence is alive because of rivers. So the rivers should be clean all the time.

It is through such activities that awareness will be created among the people. Therefore, such days should be celebrated, he said. While NCC Associate Officer Lt. Dr. Raj Taderao while guiding the NCC cadets said that plastic is being seen in large quantities in various rivers across the country today. Due to plastic, the existence of various aquatic animals in the water, like humans, is also threatened by the cleanliness of the rivers. Therefore, it is necessary to be aware.

Review of the event

A plastic free campaign was conducted in Arts and Commerce College Phondaghat through National Cadet Corps. This campaign got a spontaneous response from the students. On this occasion plastic was collected from the college premises. Awareness was raised about the excessive use of plastic in today's times and the damage it causes to the environment. Although it is not possible to completely stop the use of plastic, it is used at least So we can avoid the impact of plastic on the environment. Plastic is easy to manufacture. But it is difficult to eliminate. As it decomposes, the environment becomes toxic. Therefore, the student informed that ban on plastic usage is the only solution.

Speech of Chief Guest

AIDS or other diseases are increasing due to human tendency. Recently human behavior has become limitless. Due to this, we have to face many problems. It is necessary for the youth to be aware so that this does not happen. Also, to be aware, it is necessary to have complete information about the disease like AIDS. This is the opinion of Phondaghat Primary Health Center, Officer Dr. Sachin Jangam.
Need to be careful

The HIV virus came from South Africa. It then aired in Europe. This disease is difficult to cure. This virus is so tiny that it cannot be seen by the naked eye. One of the biggest reasons for the spread of AIDS is unprotected sex. So care should be taken. This disease is transmitted through blood. It is transmitted through genetics. So we need to take care of these things too. Dr. Sachin Jangam also said.
