Syllabus for TYBA Paper IX-A

Course: Elective Paper

Course Title: Literature and Science

Course Codes: UAENG506A & UAENG606A

Preamble:

Literature and Science are two different aspects of the human mind and both the areas had always been perceived as two completely diverse fields of academic discourses which actually is far from being true. However, Literature and science go hand in hand if we look closely. Both emerged as a consequence of curiosity. Literature is born as a product of imagination and curiosity whereas science is born as a product of experimentation and curiosity. Although both are considered different, yet they're closely related. It is said that science or its requisite elements concern with the facts, reasons, causes and effects whereas literature also deals with the same but in modified forms and therefore the bond between literature and science is truly indissoluble and cannot be denied at all. We are living in the era where science and technology has become a matter of lived social reality, a matter of daily consumption. If literature is the mirror of society, then mirroring today's reality will definitely include an element of all pervasive science. Science has become the culture of twenty first century and science-fiction therefore, has become its folklore. Science-Fiction as a genre of literature mixes literary art, scientific and philosophical speculations while evoking a sense of wonder and thus functions as a fertile ground for interaction and integration of the two seemingly different academic discourses. This course, therefore, is designed in such a way that it provides an understanding of the complex relationship between Science and Literature and, in the process, improves the dialogue between literature and science. Introducing Science Fiction as a literary genre and its various components along with the recurring themes, ideas and issues commonly dealt with, the course intends to build a compact base for understanding the most popular genre of the twenty first century. Keeping in mind the vast diversity of the genre, the course makes an attempt to be inclusive while choosing the representative stories across the world. The immense popularity of the science fiction movies and texts is a testimony to this statement. Therefore, to keep up with the time, it is imperative to include this most popular genre into our academic syllabus.

Objectives of the Course:

- To provide knowledge and understanding of the complex relationship between literature and science and its emerging bond.
- 2. To introduce science fiction literature and its different requisite elements to the students and develop interest in it.
- 3. To acquaint the students with the forms, themes, tropes, and modes of expression of Science Fiction.
- 4. To create awareness and familiarise students with the advancement in the field of science through science fiction and develop the skill of interpretation and inference.
- 5. To inculcate the utopian / dystopian perspective and positive/negative side of the advancement in the field of science and technology and explore its impact on the society trough the prescribed texts.

Outcomes of the Course:

- 1. The students will gain the knowledge of the connection between science and literature and its significance in today's postmodern era.
- 2. The students will be familiar with the prominent stream of Science Fiction along with it different elements and it may help them to develop their interest in it.
- 3. The Students will be able to understand, describe and analyze common themes, tropes, and modes of expression in science fiction.
- 4. The students will understand the indefinite exposure given to advanced science and technology in science fiction literature and it will help them to think about future and interpret and infer skillfully.
- 5. The positive side of the advancement in the arena of science and technology will be understood and utopian perspective of looking towards science and technology and its advancement will be developed through the prescribed literature.

Revised Syllabus for FYBA Communication Skills in

English Paper I and Paper II

To be implemented from 2021-22 (80:20 Marks Examination Pattern)

Preamble:

The English language is the dominant medium through which one can connect to the global community. It is, therefore, vital that all learners acquire adequate skills in this language. Communication Skills in English is a core course wherein the first year learners are guided to acquire the four skills of communication viz., Listening, Speaking, Reading and Writing.

The focus of the syllabus is on building confidence in the learners in applying these skills while using the English language both academically and socially. Keeping this in mind, the units will have a multi-pronged approach. The course is graded from basic to higher levels of learning so as to help learners gradually acquire the skills. The 80:20 pattern will also help in accomplishing this goal. The tutorial activities are designed to focus on oral skill development, while the lectures are aimed at honing their cognitive, analytical, linguistic and creative skills.

It is hoped that by the end of the academic year, the learners will have developed confidence in using the English language both for oral and written communication as well as develop interest in enhancing these skills later on.

Objectives:

- 1. To enhance English language proficiency of students by familiarizing them with the skills of Listening, Speaking, Reading and Writing (LSRW)
- 2. To introduce learners to different perspectives of looking at a text or passage
- 3. To equip learners in the functional aspects of English so that they use the acquired language skills correctly and confidently
- 4. To guide learners in the effective use of the digital medium of communication.

Outcomes:

- 1. The learners will learn to understand and interpret any text they are reading from different perspectives
- 2. The interest of learners in listening to and watching good quality audio and visual media will be aroused.
- 3. Learners will acquire proficiency in the skills of listening, speaking, reading and writing that will help them meet the challenges of the world.
- 4. The learners will develop good oral and written skills of communication in the English language.

Periods: 45 lectures + 15 Tutorials (3 lectures + 1 tutorial per week per batch) per semester

All passages, stories, articles, poems selected should help the learners develop different communication skills. Learning through example and practice with a theoretical base is the intention.
